

CYCLONIC CARPORTS, WE'LL BRING THE How To.

STRATCO FRONTIER

STRONG AND DURABLE CYCLONIC CARPORTS

FRONTIER CYCLONIC CARPORTS

PATIO CENTRAL

STORM SECURE STRENGTH

Built to survive the rigours of the Territory's harsh climatic conditions from tropical cyclones to the scorching extremes of the desert. Engineer designed for both cyclonic and non-cyclonic conditions with the strength of high tensile steel to blend with and enhance the appearance of your home.

- Standard single 3 x 6m or double 6 x 6m carports available
- Custom designed up to 6m wide and 3m high columns
- Various lengths are possible
- Galvanised SHS Columns and C-purlin beams - the Prodek roofing and associated flashings can be a mixture of Zinc/al or your choice of colour finishes
- Pre-punched purlins and welded column cleats provide an easy bolt-together framework
- Prodek roofing is fixed with special Prodek cyclone assemblies
- Stiffened carport perimeter barges for style and strength
- Columns are cast into pier footings
- Optional VT gutter and PVC downpipe can be added to one end to channel water flow.

CERTIFIED ENGINEERING

Frontier Cyclonic Carports are fully engineered to withstand the harshest weather conditions, even in tropical cyclone areas. Frontier is fully cyclone rated for all region C areas, with Region D available upon request. Pre-engineered span tables are available.

"Built to survive the rigours of the Territory's harsh climatic conditions"
