HANDI-HILANDER™ SHEDS

SHED QUARTERS

INNOVATIVE ARCHITECTURAL STYLE

More than just a practical outdoor storage shed, the architectural styling of Handi-Hilander outdoor sheds exude style and sophistication. Made from quality components, combined with strength and functionality, Handi-Hilander garden sheds are the best looking sheds in Australia!

- Strong and tough with contemporary, architectural style
- Quality door lock and handle for added security
- Easier and faster to install with slot-n-lock framework design
- Integrated in-ground and on-ground installation options available with each kit
- Reduced components and concealed fixings
- Smooth interior wall and ceiling finish
- Pre-assembled trusses for easy installation
- Stylish gutter and downpipe kit included for improved water drainage.

The 22.5 degree pitched roof not only adds to its appeal, it is also extremely practical. It combines extra head and storage room with the self-cleaning abilities of a gable roof.

Handi-Hilander storage sheds feature Hiland Tray steel roof and wall sheeting for a smooth and uncluttered finish and is available in three popular and modern colours.

STRONG, HIGH QUALITY GARDEN SHEDS

Handi-Hilander has been designed with an attractive slot-n-lock internal framework that provides high strength and flexibility. Every component used in the frame is galvanised to ensure a long, useable life. The framework makes the addition of shelving or pegboards easy, by acting as a pre-existing structure to which they can be fixed. The door is steel framed for strength and rigidity and comes with a key locking door handle for security.

EASY INSTALLATION

The framework is simple to install thanks to the preassembled trusses and a slot-n-lock system that is used to join the components together. The Hiland Tray walls feature pre-cut gable end wall sheets for easy installation. The Handi-Hilander shed can be installed yourself or Stratco can recommend an independent qualified installer to do the job for you.
